Fixed Income Investor Presentation

① Group profile & State funding guarantee

- Ⓐ Overview of a Group in orderly resolution
- Ⓑ Pursuing the resolution beyond 2024

A

Dexia has abandoned its banking license since 1 January 2024

- In resolution since 2012 and detaining a banking license until 31 December 2023
- Filing of an application with the Autorité de Contrôle Prudentiel et de Résolution (ACPR) on 4 July 2023 to **abandon the credit institution licence and authorisations for investment services of Dexia**
- Continuation of the **orderly resolution of Dexia as a non-bank as from 1 January 2024**, with the approval of the ECB granted mid-December
- Withdrawal of banking licence and authorisation for investment services enabling a **further rationalisation of Dexia's activities and a simplification of its operations**
- **Renaming of Dexia Credit Local** into **“Dexia”** as from 1 January 2024, and **Dexia SA** into **“Dexia Holding”** as from 19 January 2024

A

Dexia Group has been executing its orderly resolution plan since end of 2011

Orderly Resolution Plan

The Dexia Group entered into resolution at the end of 2011.

Validated in December 2012 by the European Commission, the Orderly Resolution Plan consists in:

- **Divesting commercial franchises**
- **Managing the run-off of the portfolio without any additional activities**

Mission

During the last ten years, Dexia did not have any new commercial activity and solely focused on managing its portfolio in run-off, mainly composed of public sector assets and government bonds. To fulfil this mission, Dexia has set **3 strategic objectives**:

- 1 Maintain the ability to refinance its balance sheet**
- 2 Preserve its capital base** in order to comply with regulatory ratios
- 3 Ensure operational continuity**

Support from States

In 2012, shareholders States have supported Dexia through:

- **A capital increase of EUR 5.5 bn** bringing the share of Belgium and France to resp. 52.78% and 46.81%
- **A funding guarantee**

In 2012, keeping a banking license was essential to execute the ORP¹

Avoiding any systemic risk

Dexia represented a **systemic risk for European financial markets** given:

- Its ~EUR 400 bn balance sheet as of the end of 2011
- Its extensive off-balance sheet derivatives with a large number of counterparties
- Its activity of financing the European local public sector, mainly in France and Italy

Securing funding

Dexia was highly dependent on Central Bank funding and needed to **maintain an access to Eurosystem mechanisms**, in addition to its other funding sources

The preservation of Dexia's banking license was essential when the Group entered the resolution process. However, its withdrawal was part of the roadmap validated by the European Commission in 2012 towards the longer-term resolution

A

After ten years of executing its orderly resolution plan ...

... Dexia has significantly reduced its footprint

All mandatory divestments were achieved by 2018.
With Crediop's merger in 2023, Dexia no longer has any significant subsidiary

... Dexia has considerably improved its liquidity position and no longer depends on Eurosystem's refinancing mechanisms

The benefits that justified maintaining Dexia's banking license in 2012 no longer apply and Dexia is able to continue its resolution outside the regulatory framework

A decision that preserves Dexia's operational continuity

Funding capacity

- Belgian and French **States funding guarantee** maintained
- **HQLA L1 eligibility** retained
- Setting up of an additional **contingency liquidity buffer**

Ability to keep robust risk monitoring and management

- **Robust risk management framework** maintained
- Setting up of an **independent Surveillance Committee** that takes over from the banking supervisors

Capacity to pursue the Orderly Resolution Plan

- Further ability to **manage the run-off of the balance sheet**
- Ability to pursue **own account trading operations**
- Retention of a **direct access to clearing houses** and the **main trading venues**

A decision enabling the implementation of a model better suited for pursuing Dexia's orderly resolution

Streamlined organisation

Simplifying regulatory production, as a non-bank

Transforming the operating model

Capturing additional cost savings

Adequate funding scheme

Securing 2 key funding pillars:

- **State-guaranteed funding** with **HQLA L1** eligibility
- **Short-term repos** (by maintaining direct access to repo platforms)

Dexia's profile post-debanking

Description and status

- **Dexia Holding**, 99.6% State-owned, **ceased to be a financial company under Belgian law in 2024**
- **Dexia is the main operating entity** and has a perimeter converging to the one of Dexia Holding, with a total balance sheet of EUR 52 billion at 31 Dec 2024; >99% of the Group's assets held by Dexia
- **Simplified and unified governance:** the members of the Management Board and Board of Directors of Dexia Holding are members of those of Dexia
- **Dexia remains a limited company** ("Société anonyme") under French Law **and the Group's issuing entity.**

Structure

Dexia is able to continue the activities essential to its orderly resolution, while being more agile in managing its cost trajectory and continuing to evolve within a secure framework

Fixed Income Investor Presentation

② Update on the resolution

- Ⓐ Recent developments
- Ⓑ Evolution of the balance sheet
- Ⓒ Portfolio breakdown and asset quality

A Recent developments

New progress in the simplification of the Group

- Transfer of Dexia debt securities to the Euro MTF market leading to the simplification of certain reporting requirements
- Simplification of the accounting framework and exit from IFRS
- Simplification of governance: reduction in the number of Board members and committees

Asset portfolio and liquidity management

- Active management of the asset portfolio and its risks
 - Implementation of two new deleveraging programmes: the Strategic Deleveraging Plan, aimed at simplifying operations, and the Maturity Reduction Plan, aimed at reducing the maturity of the balance sheet
 - Close monitoring of the UK water distribution sector: partial disposal of exposure and strengthening of provisions for the sector
- Robust liquidity position
 - Successful public issuances by Dexia as a non-bank
 - Contraction in funding needs by EUR 5 billion to EUR 37.7 bn at the end of 2024 due to portfolio reduction and lower cash collateral posted

Reshaping the operating model

- Programme for the outsourcing of certain production functions related to risk management, accounting and tax production and back-office management of operations
- Maintenance of the strategic decision-making and management activities for outsourced functions in-house
- Implementation beginning in 2024 with the definition of needs and the design of target processes with partners, prior to an in-depth testing phase in 2025 and a switchover planned for mid-2026.

B Evolution of the balance sheet

Indicative¹ Run Off Balance Sheet

For illustration purpose only (in EUR billion)

- **Sensitivity to exogenous factors**, as the amount of cash collateral posted and fair value items may be impacted by interest rate and exchange rate movements.
- As at 31 Dec 2024, net cash collateral at a historic low level of EUR 5.9 bn and funding requirement at EUR 37.7 bn
- **No numerical targets** set by the European Commission **in terms of asset disposal**; deleveraging mainly driven by asset value optimisation

1. Targeted figures as determined in the business plan of November 2012 (updated in June 2024) underlying the Orderly Resolution Plan approved by the European Commission

Portfolio breakdown and asset quality

As at 31 December 2024

Portfolio description

- **Good asset quality overall:** ~90% assets within the investment grade range
- **Low cost of risk:** limited amount of non-performing loans
- **Portfolio characterised by long-term loans to the local public sector:** ~63% with a maturity above 10 years

③ Funding and liquidity

- ① Funding mix and toolbox
- ② Features of the State funding guarantee
- ③ Focus on State guarantee issuance

A Funding mix and toolbox

- Dexia has a **robust and cost-efficient funding model** based on diversification of:
 - **Full range of funding instruments** allowing to access all liquidity sources
 - **Currencies** with strong funding franchises developed in Euro, US Dollars and Sterling
 - **Geographical** areas in terms of investor base
- The funding model proved its resilience and efficiency during the Covid-19 crisis
- No reliance on ECB funding since 2017

Dexia has a complete funding model based on 3 pillars

	State guaranteed funding		Non guaranteed
	Money market	Debt capital markets	Repo market
Maturity	Up to 1 year	1 to 10 years	Up to 1 year
Format	Commercial Papers	Bonds	Bilateral and Triparty

Targeted volumes 2025	EUR 10 bn	EUR 3.6 bn	EUR 3 bn

Funding mix

- **State Guaranteed** funding raised under the State guarantee scheme
- **Secured funding** (non-guaranteed) – Short-term repo transactions
- **Legacy funding** (mostly residual funding raised before 2011)

Features of the State funding guarantee

2. The extension of the State guarantee was approved by the European Commission in September 2019

3. Outstanding State guaranteed amount of EUR 28 billion as at 19 June 2025

4. 20% RW for foreign currencies issuances

C Focus on State-guaranteed issuance

Key pillar of the funding mix

- As the robustness of the explicit State guarantee has positioned Dexia as an SSA issuer, this source of funding progressively became the key pillar of the Group refinancing
- Regular bond and commercial papers issuances allow to benefit from a stable and cost-efficient refinancing structure
- A strong funding franchise developed since 2013 with a focus on the main currencies of the asset portfolio: EUR, USD and GBP

Indicative¹ recourse to the State guarantee

“Dexia is a government-related entity (GRE) with a very high likelihood of receiving extraordinary support from Belgium and France. We anticipate Dexia will continue to proactively manage its wind-down and further deleverage its balance sheet. We anticipate Dexia will continue pursuing the simplification of its operating model to adapt to its smaller asset base and improve its cost trajectory. Dexia maintains a robust risk management and risk appetite framework since its debanking. We believe Dexia would be very highly likely to receive extraordinary government support in times of stress.”

Standard & Poor's – 21 August 2025

“Dexia's orderly resolution has so far been unfolding smoothly, in particular because of the large support provided by the governments of Belgium and France through the government-guaranteed debt scheme. Since 1 January 2024, Dexia is no longer a bank, following its request of banking license withdrawal. Dexia is now subject to a new risk appetite framework monitored by an ad hoc surveillance committee appointed by the French and Belgian states, which will increase its flexibility to conduct the orderly resolution .”

Moody's – 19 December 2024

“Fitch Ratings has revised Dexia S.A.'s Outlook to Stable from Negative, while affirming its Long-Term Issuer Default Rating (IDR) at 'BBB+'. [...] The affirmation reflects the faster-than-expected reduction of the complexity and size of Dexia's balance sheet. We expect Dexia's balance sheet to remain well below the EUR75 billion limit of the state guarantee provided by Belgium and France, even under stressed circumstances. This offsets the impact of the guarantors' sovereign rating downgrades to 'A+'/Stable in June and September 2025, respectively.”

Appendix

Zoom on Dexia's funding capacity as a non-bank

Issuance of guaranteed debt keeping the HQLA L1 qualification

- Dexia continues to refinance its balance sheet **notably through the issuance of State-guaranteed debt**
- All GGBs issued by Dexia under this State-guarantee, **have the HQLA Level 1 qualification** (for debt already issued and to be issued after debanking)

Contingency buffer

- Dexia has constituted an **additional contingency buffer**, as it is no longer able, as a non-bank entity, to access the Emergency Liquidity Agreement (ELA) provided by National Banks

Dexia keeps the **ability to refinance its balance sheet** under appropriate conditions and volumes and to **face stressed market conditions** by maintaining a liquidity buffer and an additional contingency buffer

Zoom on the risk management framework

This system maintains three lines of defense, including compliance monitoring and AML control procedures, as well as an internal audit mechanism. It is based on a risk appetite framework (RAF) and appropriate monitoring indicators.

Solvency

Dexia sees to it that solvency is ensured in the short, medium and long term by:

- **Maintaining a level of capital sufficient to face potential risks and address adverse market conditions**
- **Preserving the best possible funding conditions**

Liquidity

Dexia monitors and manages its liquidity via:

- A number of indicators, including stressed and unstressed **survival horizons** in each relevant currency
- **Liquidity buffers** which are calibrated to cope with stressed market situations and thus avoid calling on the funding guarantee granted by the Belgian and French governments

Asset Liability Management (ALM)

Dexia maintains Asset Liability Management (ALM) in order to **measure and control the interest rate, exchange rate and liquidity risks on its balance sheet**

Operational risks

Dexia maintains the **necessary expertise to continue the orderly resolution; the employability of Dexia staff members remains a major point of attention**. Dexia makes sure that staff members are regularly informed of their prospects and that their uncertainty is reduced during the transformation

Dexia makes sure that risks linked to **relations with service providers and access to market infrastructures** are contained

Operational risks must never significantly **affect the Group's ability to manage its short-term liquidity or solvency or jeopardise business continuity**

Zoom on the independent Surveillance Committee

An independent Surveillance Committee has taken over from the banking supervisors, particularly in terms of risk and internal control monitoring

Composition

Members evenly appointed by Belgian and French States

4-year mandates

Strong expertise in banking supervision

‘Comply or explain’ policy applies to opinions and recommendations made by the Surveillance Committee to the Board of Directors

Mission

Dexia’s overall governance structure remains unchanged

- **Issue an opinion on compliance with fit and proper requirements** by candidates for the positions of members of the Board, the Management Board and candidates for the positions of heads of internal control functions;
- **Issue technical opinions on the assessment of Dexia Group's risks** regarding asset and derivative portfolios, the funding structure and the solvency and liquidity positions;
- **Issue an opinion in case of shortcoming** concerning quantitative data quality, quality of tools for monitoring risks and internal control organisation and systems;
- **Issue an opinion on risks associated with any project** the impact of which on Dexia’s balance sheet, P&L, equity or liquidity **could lead to the crossing of warning thresholds** in the short, medium or long term;
- **Alert** the Board of Directors when **Dexia’s strategic decisions**, or their execution suggest **incompatibility with the orderly resolution plan or the risk appetite framework**.

2013 and 2022 State funding guarantee mechanism

Process

- No acceleration of payment. Guarantee calls leading to payment obligations of the States only in accordance with the normal payment schedule of the guaranteed obligations (“Pay as you go”)
- Call by any third-party beneficiary or security holder, or any proxy holder, agent, settlement institution or trustee acting for the account of the former, on the guarantee by simple notice delivered to each of the States within 90 days after the date of non-payment by Dexia
- Third-party beneficiaries or security holders not required, in the context of securities and financial instruments, to exercise the guarantee, to make any demand against Dexia, to take any action against Dexia or to file claims in any insolvency proceedings relating to Dexia
- Regular guarantee payment period of 5 days for all debt issuance except USD short term funding (< 365 days) which may benefit from a shorter 3 days period
- Guarantee drawn up in French and in English, both languages being equally binding
- Outstanding guaranteed Debt to be followed on:

Results 2024 | Key figures

Net result

- Dexia reports a net loss of EUR 267 million, marked by the acceleration of asset disposals, costs related to the transformation of the Group, and provisioning for the water distribution sector in the United Kingdom
- Consolidated net loss of EUR 248 million for Dexia Holding, resulting from the same dynamics

Balance sheet

- **Balance sheet down by EUR -3.2 billion (-6%)**, driven by the reduction in the asset portfolio and the decrease in cash collateral posted
- **Asset portfolio at EUR 25.7 billion**, including EUR 18.4 billion in bonds and EUR 7.3 billion in loans

Funding

- **Outstanding debt guaranteed by the States** under the bar of **EUR 30 billion** since March 2025

Indicators 2024

Indicators of Dexia liquidity and solvency¹

Liquidity indicators

- Short-term liquidity indicator defined as the number of days during which Dexia can continue to operate with the cash and assets available to it, without access to the funding markets
- As at 31 March 2024, the survival horizon reached eight months, reflecting the inclusion in the liquidity reserve of a contingency buffer, consisting entirely of cash and intended to offset the loss of access to the emergency liquidity assistance (ELA) mechanism after the withdrawal of Dexia's banking licence on 1 January 2024

- Medium-Term Liquidity Ratio (MTLR), which reports total financing at over one year to the funding requirement of weighted non-liquid assets:

$$\frac{\text{Static financing >1 year}}{\text{Total financing requirement for non-liquid assets}} \geq 100\%,$$

Where: total static financing > 1 year = 100% * (equity + liabilities with a residual maturity > 1 year and financing requirements for non-liquid assets = 70%* (non-liquid assets) + 20% * variation margins on derivatives + 70% * initial margins on derivatives

Solvency indicator

- Reports the statutory capital level in French GAAP as a percentage of the balance sheet total
- Definition consistent with the CRR regulatory banking ratio (*Leverage ratio*), which sets a minimum level to be met of 3%
