

Dexia S.A.

Key Rating Drivers

Support-Driven Ratings: Dexia S.A.'s ratings reflect Fitch Ratings' view of a high probability of additional support from Belgium and France, if needed, to complete an orderly wind-down. Dexia is the main operating entity of Dexia Holding SA/NV, which is owned 53% by Belgium and 47% by France.

Strong Evidence of Support: Our view is based on Dexia's ownership, the large funding guarantees provided by Belgium and France and the two countries' ability to provide financial support. Dexia had about EUR24 billion of guaranteed debt outstanding at end-June 2026, and we expect the use of guarantees to remain materially below the EUR75 billion limit applicable since January 2022. The guarantee is granted by Belgium and France on a 53%/47% basis.

No Retroactive Application of BRRD: Fitch continues to factor in state support for Dexia, despite the implementation of the EU's Bank Recovery and Resolution Directive (BRRD). This reflects our view that the BRRD will not be applied retroactively to Dexia, as long as its orderly wind-down progresses in line with plans agreed with the European Commission.

No Viability Rating Assigned: Fitch does not assign a Viability Rating to Dexia because it cannot be properly analysed as a viable entity in its own right, and it is no longer commercially active. Dexia is in an orderly wind-down and relies on state guarantees for funding.

Low Risk of Senior Bail-In: The risk of senior creditor bail-in is low for Dexia. The entity, now a non-bank, is no longer subject to regulatory capital requirements, which could have triggered a bail-in of senior unsecured debt if breached.

Withdrawal of Banking Licence: Dexia's surrender of its banking licence in January 2024 marked a significant milestone in the company's orderly resolution. This step formed part of the implementation of the orderly resolution plan validated by the European Commission in December 2012.

Deleveraging Progressing Well: Dexia's balance sheet was about EUR43 billion at end-2025, compared with about EUR362 billion at end-2011, when the company was placed in orderly wind-down. Dexia has materially simplified its legal structure since the start of the orderly resolution. The company is currently implementing a large-scale outsourcing plan across multiple functions to further streamline its organisation.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

Dexia's Government Support Rating (GSR) and Issuer Default Ratings (IDRs) are sensitive to a weakening in Belgium's and France's ability or propensity to provide additional support.

A material reduction in state ownership or state-guaranteed funding that is not driven by lower funding needs, leading to a reduced incentive to provide additional support, would also be negative for the ratings.

A material deviation from Dexia's wind-down plan agreed with the European Commission would lead to negative rating action. Fitch expects this would likely trigger a fresh state aid review and heighten the likelihood of the authorities requiring more stringent measures, which could include burden-sharing by senior creditors. However, this is not our base case scenario.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

An upgrade of the GSR and IDRs would be contingent on the two countries demonstrating even greater support, which we view as unlikely.

In the long term, we could upgrade Dexia's Long-Term IDR on a further material reduction of the size of its balance sheet and the lifetime of its asset portfolio.

Other Debt and Issuer Ratings

Rating Level	Rating
Guaranteed debt (long term/short term)	A+ / F1+
Deeply subordinated Tier 1 notes	C

Source: Fitch Ratings

Dexia's Short-Term IDR of 'F1' is the higher of the two possible options mapping to a 'BBB+' Long-Term IDR. This is because we view the Belgian and French sovereigns' propensity to support as more certain in the near rather than the long term.

The 'A+'/'F1+' ratings of Dexia's guaranteed debt are aligned with Belgium's and France's ratings, as long as both are equal. Otherwise, the guaranteed debt ratings would be aligned with that of the lowest-rated guarantor. Each sovereign is responsible for a share of the guarantee, and Fitch rates Dexia's state-guaranteed debt on a 'first-dollar-of-loss' basis. The guarantee is unconditional, irrevocable and on first demand.

The 'BBB+(dcr)' Derivative Counterparty Rating is at the same level as Dexia's Long-Term IDR, as derivative counterparties in France have no preferential status over other preferred senior obligations in a resolution.

Dexia's deeply subordinated Tier 1 notes' 'C' rating reflects the continued ban imposed by the European Commission on contractually non-mandatory coupon payments on these notes, and their poor recovery prospects.

Dexia's Short-Term IDR could be downgraded if its Long-Term IDR were downgraded.

The 'A+' long-term rating on Dexia's state-guaranteed debt is sensitive to a downgrade of one of the two sovereign guarantor ratings. The 'F1+' short-term rating on Dexia's state-guaranteed debt would be downgraded if the Short-Term IDR of either of the two guarantors were downgraded.

Dexia's Derivative Counterparty Rating is primarily sensitive to changes in its Long-Term IDR.

Fitch does not expect coupon payment to resume on Dexia's deeply subordinated Tier 1 notes and, therefore, sees no upside for the instrument's rating.

Company Summary and Key Qualitative Factors

Business Profile

Orderly Wind-Down Since 2012

Dexia was a specialised public-sector lender operating worldwide. The European Commission approved Dexia Holding's orderly resolution plan in December 2012. It aims to wind down the group in an orderly manner, without threatening financial market stability. The resolution plan included a EUR5.5 billion capital injection by Belgium and France, which resulted in the two countries owning about 53% and 47% of the group's share capital, respectively.

Dexia is no longer commercially active, but its balance sheet will remain fairly large for an extended period. The balance sheet was about EUR43 billion at end-2025, well ahead of its asset disposal schedule. Dexia's funding requirement further decreased by EUR7 billion to about EUR31 billion at end-2025, both from the reduction of the assets portfolio and the decreasing amount of cash collateral posted.

Operational Simplification Almost Complete

Dexia's operational simplification is drawing to an end, signalling good progress on the orderly resolution plan. The company ceased to publish consolidated financial statements and surrendered its credit institution licence and investment services authorisations in 2024. Dexia also announced several large-scale outsourcing agreements for risk-management, accounting and back-office functions, which should be completed by 2027.

Risk Profile

Exposure to European Countries and Public Entities

Dexia is incorporated in France. It has some concentration risks in southern European countries, which represented about 40% of total exposure at end-2025, while exposure to countries outside Europe was about 15%. About two-thirds of Dexia's portfolio was exposed to the public sector or to central governments at end-2025.

Adapted Risk Framework

Dexia operating as a non-bank reduces the risks of bail-in of senior unsecured debt, as it is no longer subject to capital requirements. Dexia has nonetheless replaced the prudential banking supervision framework with an appropriate ad hoc risk-management and monitoring framework to ensure the sustainability of its orderly resolution. The company has adopted revised key risk indicators to monitor its solvency and liquidity risks.

Financial Profile

Asset Quality

Mainly Exposed to Low-Risk Public-Sector Assets

Dexia's credit risk is generally contained, but a pocket of risk remains in the form of exposure to higher-risk European countries, such as Italy (end-2025: EUR11 billion), which are mainly to local authorities and the Italian sovereign (BBB+/Stable). The exposure to Spain (EUR1.3 billion) is dominated by the public sector, with a limited direct exposure to the sovereign (A/Stable). About 20% of Dexia's total exposure is to the UK (AA-/Stable), more than 40% of which is to the public sector.

About 90% of Dexia's credit risk exposure was rated in the 'BBB' category or above, based on Dexia's internal ratings, at end-2025. Speculative-grade exposure (EUR3.3 billion) accounted for about 90% of Dexia's equity.

Earnings and Profitability

Structurally Loss-Making

Dexia is structurally loss-making as its revenues are declining faster than its costs. Dexia's hedging derivatives book has generated accounting volatility and reduced profitability over recent years. The significant amount of collateral posted on swaps needs to be funded and inflates interest expenses. However, it has sharply decreased since mid-2022 (end-2025: EUR4.9 billion) due to rising rates, which reduced funding costs.

Deleveraging and transformation costs led to an operating loss of EUR134 million in 2025, lower than in 2024, as the latter was also affected by impairment charges related to provisions in the UK water distribution sector. Dexia manages costs tightly, as it adapts them to the decreasing portfolio. The company has gradually outsourced key functions since 2023, and will continue to do so over 2026-2027.

Capitalisation and Leverage

Satisfactory Capitalisation

Dexia's capital position is sound and provides an ample buffer to absorb potential losses. While Dexia is no longer required to comply with regulatory capital requirements, our view of Dexia's solvency remains unchanged, as the company has nonetheless defined a new risk framework and now uses its leverage ratio (end-2025: 8.6%) to monitor its solvency.

Funding and Liquidity

Reliance on State-Guaranteed Funding; Adequate Liquidity Buffer

State-guaranteed debt is Dexia's main funding source (close to 80% of non-equity funding at end-2025). Because Dexia's guaranteed debt has remained eligible for the high-quality liquid assets classification, the withdrawal of the banking licence has not affected its ability to access wholesale funding.

Dexia has adopted revised key risk indicators (survival horizon and medium-term liquidity ratio) to monitor its liquidity. Dexia's liquidity buffer (about EUR10 billion at end-2025) is composed of cash, reverse repos and unencumbered liquid assets, which secures a stressed survival horizon materially above the internal limit.

Dexia's liquidity is supported by higher interest rates, as they result in decreasing cash collateral requirements, lowering funding needs. Conversely, Dexia is negatively exposed to a decrease in interest rates, but we believe that this scenario would result in a limited increase of the funding requirement.

High Probability of Support

Fitch considers that there is a high probability that Belgium and France would provide additional support to Dexia, if required, to complete the orderly wind-down of the company. Both sovereigns are the main shareholders of Dexia’s parent Dexia Holding.

Our view on support is based on the ownership of Dexia, the large funding guarantees provided by Belgium and France, of up to EUR75 billion, and both sovereigns’ ability to provide financial support. The extension of the guarantee from 2022 for 10 years did not change our view on support.

At end-2025, Dexia’s total assets represented about 7% of Belgium’s 2025 GDP, where the holding company is incorporated, and less than 2% of France’s 2025 GDP.

Fitch continues to factor in state support for Dexia, despite the implementation of the BRRD. This reflects our view that the BRRD will not be applied retroactively to Dexia, as long as its orderly wind-down progresses in line with plans agreed with the European Commission.

Environmental, Social and Governance Considerations

Environmental Relevance Scores

General issues	Score	Sector-specific issues	Reference
GHG Emissions & Air Quality	3	Regulatory risks, emissions fines or compliance costs related to owned, financed or managed assets, which could impact asset prices, profitability, etc.	Operating Environment; Business Profile; Risk Profile; Asset Quality

ESG Scoring

ESG relevance scores range from '1' to '5' based on a 15-level colour gradation. Red (5) is most relevant to the credit rating and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the general and the sector-specific issues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issue, signalling the credit relevance of the sector-specific issues to an issuer's overall credit rating. The Reference column highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis. The panels underneath the relevance scores tables are visualisations of the frequency of occurrence of the highest ESG relevance scores across the combined E, S and G categories. The Score columns summarise rating relevance and impact to credit from ESG issues. The column on the far left identifies any ESG relevance sub-factor issues that are drivers or potential drivers of an issuer's credit rating (corresponding with scores of '3', '4' or '5'). All scores of '4' and '5' are assumed to reflect a negative impact unless indicated with a '+' sign for positive impact.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The general and sector-specific issues draw on the classification standards published by the UN Principles for Responsible Investing, the Sustainability Accounting Standards Board and the World Bank.

Credit-Relevant ESG Scale

	5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to 'Higher' relative importance within the Navigator.
	4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to 'Moderate' relative importance within the Navigator.
	3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to 'Lower' relative importance within the Navigator.
	2	Irrelevant to the entity rating but relevant to the sector.
	1	Irrelevant to the entity rating and irrelevant to the sector.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit <https://www.fitchratings.com/topics/esg/products/esg-relevance-scores>.

SOLICITATION & PARTICIPATION STATUS

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

FORECAST DISCLAIMER FOR FINANCIAL INSTITUTIONS

Any forecast(s) in this report reflect Fitch's forward view on the issuer's financial metrics. They are constructed using a proprietary internal forecasting tool and based on a combination of Fitch's own performance assumptions, macroeconomic forecasts, sector-level outlook and issuer-specific considerations. As a result, Fitch's forecasts may differ materially from the rated entity's forecasts or guidance and may not reflect the assumptions that other market participants may make. To the extent Fitch is aware of material non-public information with respect to future events, such as planned recapitalisations or merger and acquisition activity, Fitch may not reflect these non-public future events in its published forecasts. However, where relevant, such information is considered by Fitch as part of the rating process.

Fitch may update the forecasts in future reports but assumes no responsibility to do so. Original financial statement data for historical periods may be processed by affiliates of Fitch, together with certain outsourcing services. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by its employees.

Fitch's forecasts are one component used by the agency to assign a rating or determine an Outlook. The information in the forecasts reflects material but not exhaustive elements of Fitch's rating assumptions for the issuer's financial performance. It cannot be used to establish a rating, and it should not be relied on for that purpose.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
